FIELD CHECK LIST: Checklist order, common and scientific names used are those given in E. De Juana, List of the birds of the Iberian Peninsula, 1995, SEO_Birdlife. English ones are taken from the “British Birds” List of English names of Western Palearctic birds.

NOTE: The total of species in Aragón is 360 (Rocín, Anuario Ornitológico de Aragón, 2013), but the checklist only includes the 232 species which are commonly and regularly watched. It must be pointed out that some of these birds can only be registered at particular time of the year or at very concrete spots.
